## WEAK AND UNDEVELOPED

Conditions of the human form successfully treated to develop, strengthen, enlarge all weak, undeveloped, feeble organs and parts of the body which have not or never attained a proper and natural size, due to ill health, abuse, excesses, or unknown causes. There is one method and only one, by which this may be accomplished. Increased flow of blood to any part, produced by simple systematic action automatically, creates new tissue, tone and vigor by the same natural laws as the increase of size and strength of muscles. Don't be prejudiced because little quacks propose by silly "There's no trap back of our offers. Our day will come when the public knows clearly science from fiction. Write us for instructions, full description, proofs, references, etc. All sent you in plain sealed letter without cost of any kind."
